The Fourth China International Supply Chain Expo

2026.6.22-26

China International Exhibition Center (Shunyi Venue)
Beijing, China

China International Supply Chain Expo (CISCE) is the world's first national-level exhibition focusing on the supply chain. CISCE effectively promotes the integration of the upstream, midstream, and downstream sectors across related industries, facilitates collaboration among large, medium, and small enterprises, fosters synergy among industry, academia, research and practical application, and enhances interaction between Chinese and international businesses. Together with all parties, it advances the formation of closer global partnerships in the supply chain.

CISCE is hosted by China Council for the Promotion of International Trade (CCPIT) and organized by the China International Exhibition Center Group Limited (CIEC). Since 2023, CISCE has been successfully held for three consecutive editions, achieving remarkable success. The Fourth CISCE will maintain its full-industry-chain perspective, featuring six major chains: Digital Technology, Advanced Manufacturing, Green Agriculture, Healthy Life, Smart Vehicle, and Clean Energy, along with the Supply Chain Service Exhibition Area. These sectors represent some of the world's most critical and dynamic fields.

This year's CISCE will launch a major "Artificial Intelligence Zone" within the Digital Technology Chain. The zone will focus on key segments such as core components, large-scale models, and intelligent terminals, and will bring together leading companies and their ecosystem partners to present a comprehensive showcase of breakthroughs and achievements in the field of artificial intelligence.

We sincerely welcome you to visit the 4th CISCE.

Editor's Note

Since 1995, the China Council for the Promotion of International Trade (CCPIT) has compiled and printed the Chinese-English bilingual annual report of Fairs and Exhibitions in China (hereinafter referred to as "the book") every year, and published information about major economic and trade exhibitions to be held in China that year. The book has been welcomed by embassies and consulates in China, trade associations, as well as enterprises, as it provides an important reference for them to participate in and visit these fairs and exhibitions.

Fairs and Exhibitions in China (2026) (hereinafter referred to as "the book 2026") is coordinated by the CCPIT Department of Exhibition Management (Office of International Exhibitions Bureau and World Expo Affairs). The Academy of the CCPIT is responsible for its compilation.

To better understand and use the book, please follow the details below:

I . Scope of Data

The terms of fairs, exhibitions, and expos in the book 2026 are limited to economic and trade ones, excluding public performances and events related to culture, recruitment, local small fairs, and others.

The book 2026 has collected information on about 1400 selected economic and trade fairs and exhibitions to be held in 2026 in over 80 Chinese cities of 32 provinces/autonomous regions/municipalities, as well as Hong Kong and Macao Special Administrative Regions. Project data includes name, time, venue, host & organizer, display content, and contact information of these fairs and exhibitions. Readers can search for information by the host city or the industry.

II . Source of Data

The data in this book mainly comes from the CCPIT local sub-councils and industrial sub-councils, exhibition hosts and organizers, exhibition centers, and online/printed official media.

III . Limitations and Accuracy

Due to various reasons, the uncertainty remains whether the fairs and exhibitions in the book 2026 will proceed as scheduled, and the information on some projects has not yet been clarified when the book is to be published. Although the Editorial Committee has cross-checked the data through various means, there may still be changes and modifications in terms of the date, venue, or even the alteration, cancellation, or addition of the projects.

Therefore, users are advised to contact the hosts and organizers to verify the details before participating in or visiting the fairs and exhibitions.

IV . Download and Search

The book is available in both printed and electronic versions, and is also open to online searching. Readers can visit the website of exhibition.ccpit.org and download it.

Equipment Special Committee, Chamber of Commerce for High Technology and Equipment Industry, Beijing Military Civilian Integration Collaborative & Innovative Association

Organizer: China Beijing International Military Police Equipment & Anti-terror Expo Organizing Committee, Beijing Qifa Exhibition Service Co., Ltd.

Sector: Public Safety

Area: 30000m²

Contents: Military and police training equipment, including shooting range apparatus, counter-terrorism and optical equipment, is essential. Additionally, security inspection and explosive ordnance disposal equipment, as well as detection tools for toxic substances and drugs, play a crucial role. Criminal investigation and forensic technology, along with evidence preservation equipment, are also significant. Law enforcement requires evidence collection and archive management, as well as office and case-handling equipment. Safety protection is paramount, encompassing bulletproof gear and military police attire. Equipment cabinets, gun safes, drones, robots, special vehicles, rescue equipment, and special lighting are all part of the arsenal. Emergency medical equipment and epidemic prevention supplies are indispensable. Furthermore, command communication, cybersecurity, smart security, and big data capabilities are vital for modern military and police operations.

The 4th China International Supply Chain Expo

Duration: 2026/6/22—2026/6/26

City: Beijing

Venue: China International Exhibition Center (Shunyi Hall)

Host: China Council for the Promotion of International Trade

Organizer: China International Exhibition Center Group Limited

Sector: Comprehensive Sectors

Area: 120000m²

Contents: China International Supply Chain Expo (CISCE) is the world's first national-level exhibition focusing on the supply chain. CISCE effectively promotes the integration of the upstream, midstream, and downstream sectors across related industries, facilitates collaboration among large, medium, and small enterprises, fosters synergy among industry, academia, research and practical application, and enhances interaction between Chinese and international businesses. Together with all parties, it advances the formation of closer global partnerships in the supply chain.

CISCE is hosted by China Council for the Promotion of International Trade (CCPIT) and organized by the China International Exhibition Center Group Limited (CIEC). Since 2023, CISCE has been successfully held

for three consecutive editions, achieving remarkable success. The Fourth CISCE will maintain its full-industrychain perspective, featuring six major chains: Digital Technology, Advanced Manufacturing, Green Agriculture, Healthy Life, Smart Vehicle, and Clean Energy, along with the Supply Chain Service Exhibition Area. These sectors represent some of the world's most critical and dynamic fields.

This year's CISCE will launch a major "Artificial Intelligence Zone" within the Digital Technology Chain. The zone will focus on key segments such as core components, large-scale models, and intelligent terminals, and will bring together leading companies and their ecosystem partners to present a comprehensive showcase of breakthroughs and achievements in the field of artificial intelligence.
