Black plastic bottle.

Is the product counterfeit?

Unknown

Is this notification linked to a Business Gateway case?

Type of risk Chemical

Risk description (technical defect and consequences)

The product contains the aromatic amine o-toluidine (measured value: 5.7 mg/kg). O-toluidine may cause cancer and might induce mutations.

Legal provisions (at EU level) and European standards against which the product was tested and did not comply The Council of Europe Resolution ResAP (2008)1 on requirements and criteria for the safety of tattoos and permanent make-up, recommends that aromatic amines with carcinogenic, mutagenic, reprotoxic or sensitising properties should neither be present in tattoos and permanent Makeup products nor released from azo-colourants.

(Overall) risk level Serious
