Project timeline: Implementing a new mobility solution

Doppelmayr

Paris as a role model

- Identification of insufficient situation
- Focus on high demand areas
- Clear political commitment
- Definition of requirements

Doppelmayr

Analysed options

- Extension of metro
- Expansion of bus services
- Construction of tramway
- Construction of ropeway

Doppelmayr

Benefits ropeway option

- Meets the requirements best
- Seamless transfer to bus and metro
- Bridging over obstacles
- Small footprint
- Reduced travel times
- Integrates into the existing environment

Doppelmayr

Declaration public utility

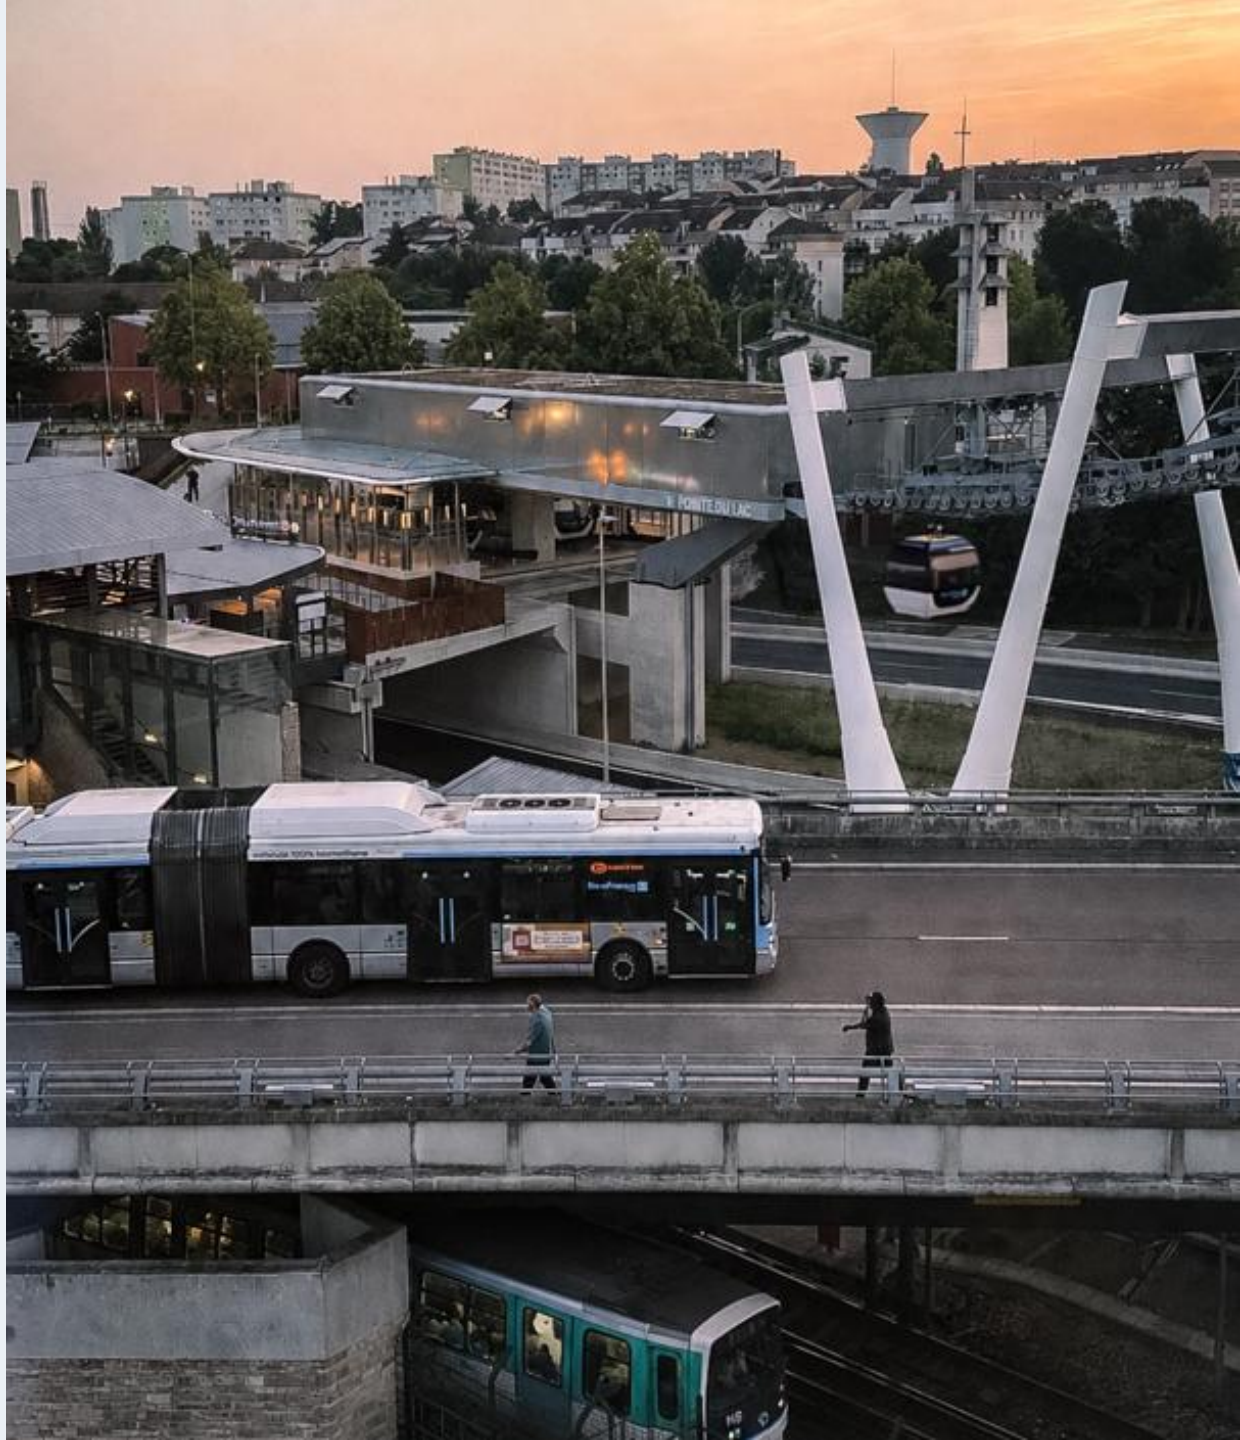

- Statement: benefit > negative impact
- Last barrier to project realisation
- Final political act
- Afterwards: Building permits according to local laws

Doppelmayr

Lessons from Paris

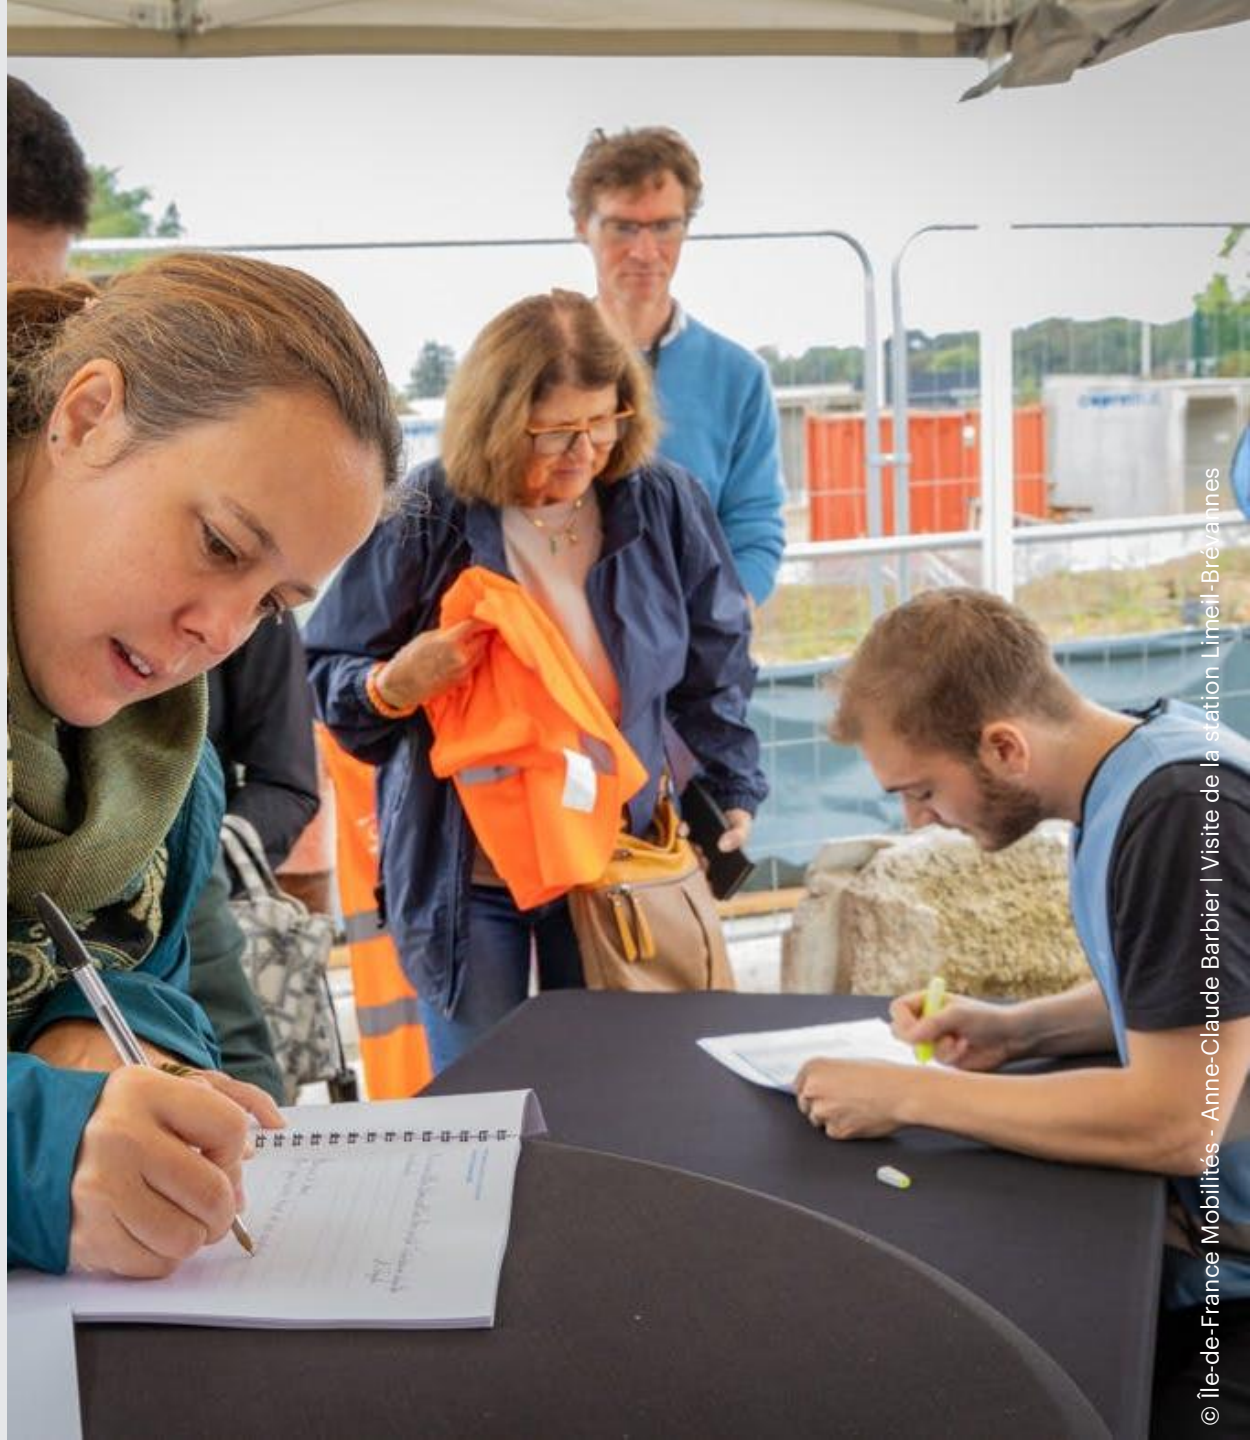

- Clear political commitment to improve mobility
- Think integrated: multimodal network
- Use the best suited mode for each connection
- Create attractive alternatives

Doppelmayr

Ideal planning process

- Starts with political commitment
- Experts, politicians, community work together
- Proper studies are the fundamentals
- Political decision to proceed and implement
