Shields Up | CISA

The US nation's cyber defense agency, CISA recommends all organizations -- regardless of size -- adopt a heightened posture when it comes to cybersecurity and protecting their most critical assets and gives guidance how to ensure the organisations' cyberresilience.

SME cybersecurity best practice quiz

The "SME cybersecurity best practice quiz" is specifically designed to help companies' staff to increase awareness about basic security guidelines to be applied in their day-to-day routine. By answering a set of questions through a quick and straightforward online self-assessment, SMEs can easily understand where they stand in terms of their cybersecurity posture.

Secure Backups

3-2-1 rule to safeguard data by ENISA

Ransomware

Ransomware is malware that locks your computer and mobile devices or encrypts your electronic files. When this happens, you can't get to the data unless you pay a ransom. The "[No More Ransom](#)" website is an initiative with the goal to help victims of ransomware retrieve their encrypted data without having to pay the criminals.
